

# 108. Spell Chess

Spell Chess is a creative variant of traditional chess that combines the movements of regular chess with two possible spells to cast:

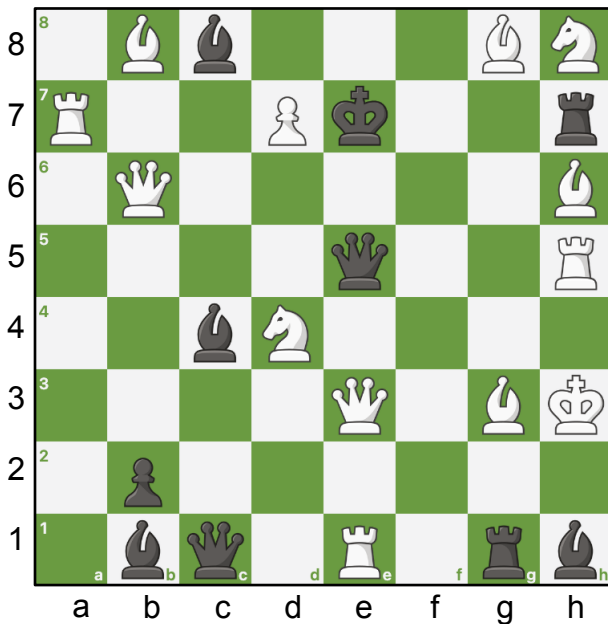

- Freeze pieces so they can't move.
- Make one piece jumpable so that it can be passed through.

These spells introduce layers of tactical depth, encouraging players to plan not only their pieces' motions but also the timing and impact of their magic.

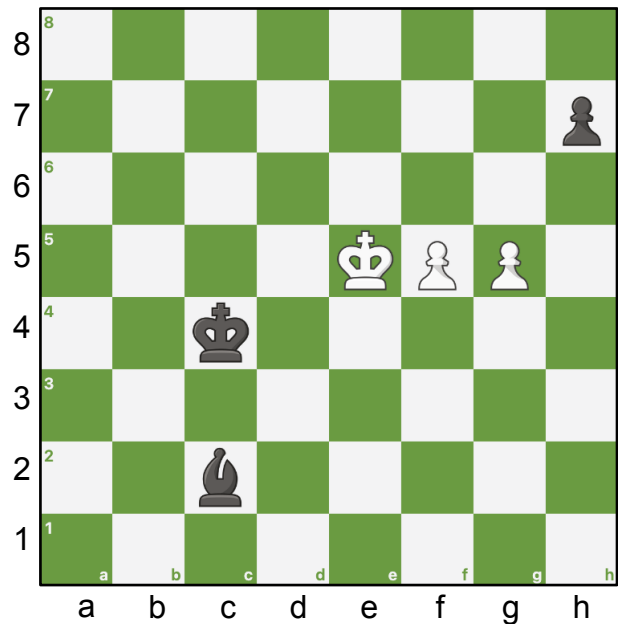

## Challenge Puzzles

① White to play - Find best move.

② White to play - Find best move.
